FILTERTHERM®

DPF THERMAL OVEN

FTM24403A

Like most in the industry, we used a variety of kilns over the years for our baking cycles and found them lacking. So, we created the **Filtertherm® DPF Thermal Oven**. Unlike other "kilns" in the industry, our oven is designed specifically for DPF cleaning. Purpose-built for all types of operations and accommodates multiple filters of varying sizes and shapes.

- **Extra Large Capacity to bake 6-8 filters at once** and a stainless-steel grate (to protect the oven floor).
- **Cool-Touch Technology:** outside of the unit remains safe to touch while baking.
- **Smart-Touchscreen controls** take the guess work out of DPF cleaning with pre-programmed settings for OEM, aftermarket and retrofit filters.
- **Standard safety features** include: a temp-controlled door lock, auto shutoff for over-temp conditions, and employee pass codes to prevent unauthorized users.
- **Built in the USA** to UL specifications and includes required electrical connectors.

Specs: 208, 220, 240v, 3 phase power required | **Internal dimensions:** 34" H (w/stainless steel grate) x 36" W x 34" D
Shop footprint: 70" H x 64" W x 98" D (door open)

DPF COOLING CART

FTM9001

Waiting for hot filters to cool down after baking can seem to take forever; rushing the process can put the filter at risk. The **Filtertherm® DPF Cooling Cart** is a great solution to help reduce the typical time between pulling, cleaning, and reinstalling a filter.

- **Decreases the cooling time by 2 - 4 hours** (depending on environment).
- **Simple to operate.**
- **Easy to move** on lockable heavy-duty casters.
- **Ergonomic height:** easily slide filters from the oven to the cart.

Specs: 110v single phase power required | Shop footprint: 34" H x 54" W x 27.25" D

MADE IN
THE U.S.A.

PULSE CLEANER

FTM9981

The **Filtertherm® Gen 2 Pulse Cleaner** uses a high-velocity, low-pressure air pulse to de-ash and blow out DPFs. Works seamlessly with the Filtertherm® DPF Thermal Oven.

- **Fast process time** - approx. 20 minutes or less.
- **Self-Contained cleaning system** prevents contaminants from escaping into ambient air during operation.
- **Automated controls** for simple and easy operation.
- **Accommodates** many different sized OEM, aftermarket and retrofit filters.
- **Includes the 12" Diam Riser Set (FTMPM24R)**, designed to accommodate filters of different heights.

Specs: 115v single phase 15 amp power required | Dry compressed air source of 90 PSI minimum at 4 CFM
Accommodates filters 11-15" diam. and 11.5 - 20" length (adapters available for other sizes)
Equipment Dimensions: 34" W x 44" D x 79" H | Shop Footprint: 34" W x 72" D x 79" H (with the doors open)

DPF INSPECTION TABLE

FTM8003

The **Filtertherm® DPF Inspection Table** is designed for taking precise pre and post cleaning measurements, such as the **flow rate and weight** of a filter - a vital part of the cleaning process.

- **Calibrated scale** to get before and after cleaning weight values.
- **Flow Rate side** for measuring air flow readings before and after cleaning.
- **Ergonomic height** for better workplace safety and ease of use.
- **Equipped with a powerful light** that allows you to inspect a filter for cracks.
- **Includes adapter rings** for different diam filters, and a holder for the wire rods used for pin testing.
- **USB charging port** & a shelf for your smart device.

Specs: Electrical: 120V 1 phase 19A power required
Equipment Dimensions: 46" W x 33" D x 35" H (47" H including display head)
Shop footprint: 48" W x 36" D x 47" H (locking caster wheels)

DUST COLLECTOR KIT

FTM8004

MADE IN
THE U.S.A.

The **Filtertherm® Dust Collector Kit** consists of a compact blow table that connects to a portable cyclone dust collector. Designed for shops with space demands and makes a great addition to larger DPF cleaning systems.

- **Easily portable** to move from location to location (on casters).
- **Ergonomic height** for better workplace safety and ease of use.
- **Industrial fan motor** that provides ample CFM.
- **High Efficiency Cyclone** (over 99% separation).
- **22-gallon drop-down dust bin** with liner bag holder and fill level viewing window.
- **Hospital-grade HEPA filtration**
- **Vacuum hose port** for easy cleaning.

Specs: 115v single phase power required | **Shop footprint:** 65" H x 73" W x 27.25" D

Let us show you how our **DPF CLEANING EQUIPMENT** & proven multi-step cleaning process can **WORK FOR YOU**. Filtertherm provides a quick return on investment (ROI) for professional DPF cleaning shops & fleets.

FILTERTRAK[®]

FilterTRAK™ is the best way to track your DPF cleanings. This cloud-based web app stores filter pictures, vehicle information, filter information, cleaning records & more. Plus, send detailed cleaning reports from the app to your customers for their records. Visit www.FILTERTRAK.DIRECT

Filtertherm® DPF Cleaning Equipment now available exclusively from Redline Emissions Products®

“Offering **Filtertherm®** under the **REP** brand is a logical extension, adding enormous value to our robust all-makes line of DPF parts & accessories.”

- Anthony Soto, REP National Sales Manager
